WorkSave Buy Out Plan/WorkSave Pension Plan/WorkSave Pension Trust

FUND AIM

To track the performance of the FTSE A Index-Linked (All Stocks) Index (including re-invested income) to within +/- 0.25% each year for two years out of three.

RISK AND REWARD PROFILE

The fund's risk rating is based on the historic volatility of the fund's value and it may change in the future.

Investment funds with a lower risk profile typically exhibit fewer price fluctuations and therefore a lower probability of temporary capital losses. Funds with a high risk rating typically experience greater fluctuations in value and maintain a greater risk of capital losses.

For more information on the investment risks that are specific to this fund, please refer to the Fund Specific Risks section on page 3.

Performance data source: Lipper. **Returns are calculated on the basis of daily midday dealing prices, those at which you transact.** Other fact sheets may show returns on a different basis, e.g. daily midday mid-market prices. Fund performance is shown net, which is after the deduction of the fund management charge.

The fund performance does not take account of any product charges applicable to your scheme. You can find more information about our charges in the terms and conditions booklet (for example, the Member's Booklet and Member's Policy Booklet) or Key Features documents.

Past performance is not a guide to the future. The value of an investment is not guaranteed and can go down as well as up. Exchange rate variations can cause the value of overseas investments to increase or decrease. You may not get back the amount you originally invested. For overseas markets the figures are sterling adjusted and net of any withholding tax.

CHARGES

Investment management charge (IMC)	0.08%
Additional expenses (AE)	0.00%
Fund management charge (FMC = IMC + AE)	0.08%

The IMC is taken by adjusting the unit price of the fund daily.

PORTFOLIO BREAKDOWN (%)

All data sourced from Legal & General Investment Management unless otherwise stated. Totals may not add up to 100% due to rounding. In order to minimise transaction costs, the Fund will not always own all the assets that constitute the index and on occasion it will own assets that are not in the index. The number of fund holdings can differ from the index due to corporate events and proxy holdings.

INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

FUND SPECIFIC RISKS

- Investment returns on fixed interest securities, such as corporate and government bonds, are particularly sensitive to trends in interest rate movements and inflation. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low, or negative interest rate environment and longer dated fixed interest securities will fall by more than short dated fixed interest securities.
- The fund invests in fixed interest securities. The financial strength of a company or government issuing the security determines their ability to make some or all of the payments due. If this financial strength weakens, the chances of them not making payments increases and this will reduce the Fund's value.
- The Fund invests almost exclusively in fixed interest bonds from a single or small number of issuers, such as companies or governments. If any of these issuers experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- The fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The fund should be utilised as part of a diversified investment strategy within a wider portfolio of funds. These funds are not designed to be solely invested in.
- This fund is able to delay paying out, which may mean that you have to wait to get your money. A delay may happen when market conditions mean it is difficult for the fund manager to cash in investments to pay out to investors. For example, a fund with investments in commercial properties may find they may take time to sell. Whilst waiting to complete on the sale of properties, the fund manager may suspend making payments to investors who want to cash in. The fund can only delay paying out if it is in the interests of all investors.

GLOSSARY

Investment management charge (IMC)

This charge covers the costs of managing your fund.

Additional expenses (AE)

This is an allowance for variable fund expenses not included in the IMC.

Fund management charge (FMC)

This charge is the sum of the IMC and AE. Please see your Member's Booklet, Member's Policy Booklet or Key Features document for more information.

ABI sector

ABI sectors are defined by the Association of British Insurers (ABI). They are a way of grouping funds with similar characteristics so they're easier to compare.

Lipper

A company that supplies fund data such as performance. We use Lipper to provide past performance data on our fund fact sheets.

Indicative spread

'Spreads' reflect the underlying costs of buying and selling assets in a fund and are included in the daily unit price so will not be shown as a separate charge on your statements. The spread shown aims to provide an indication of potential spreads incurred when transacting in this fund, but what you pay will vary from this. You can find more information on transaction costs here.

In exceptional market conditions spreads may widen considerably and be subject to frequent change, so what you pay may be significantly different and higher from normal market conditions.
